

HD Digital Video Microscope with Boom Stand

BVM-2000N-BS

PRODUCT PARAMETER

Magnification	12X-78X, Extend to 9X-155X
Objective Lens	0.7X-4.5X
Illuminant	LED light built-in design
Interface	HDMI/VGA Port
Screen	12" (282*178mm)
Display resolution	1080P HD LCD screen
Function	Camera drawing, video display, graphic measurement, video recording.
Inspection	High definition optical inspection
Upgrade	Access to usb storage and upgrade
Measurement	Connect the mouse to operate

Introductions:

This is a new design and Exclusive digital video microscope. Its functions include Camera drawing, video display, graphic measurement, video recording, which is not only for mobile phone repair but also jewelry welding and more precision welding works. 12-78X magnification details will be display on 12 inch screen with 1080 HD resolution. Graphic measurement function of this microscope will help you solve more problems.

The BVM-2000N is an intelligent digital microscope. Due to the many accessories it can be used in many areas. Among other things, it is also useful in the following fields: industry, life sciences, mineralogy, insect barn, botany, crime lab, education, etc. For its simplicity, its use is easy to learn.

Main Specifications:

Microscope:

Magnifications: 12X-78X(ZOOM) (optional magnifications: 9X-220X)

Built in 0.35X Video Coupler; 0.5X for options.

Standard 1X Objective Lens; 0.75X, 1.5X and 2X for options.

FOV: 23mm- 3mm; Max. 30mm for options

Boom Stand Main / Cross Pole: **390mm / 340mm**

Camera:

2.0M HDMI, true color, no delay.

Max. Resolution: 1920*1080

Sensor: 1/2.86 inch SONY sensor

Pixel Size: 2.75*2.75 μ m

Frame Rate: 60fps@1920*1080

SNR: 65DB

LCD Display:

12 inch HD LCD display, 1080P, wide screen, multi angle adjustment.

Illumination:

High quality LED illumination, 144 LED bulbs.

Operation:

Wireless mouse or manual operation, image capture, U disk storage and measurement.

Features:

This is an intelligent all in one microscope. Support high definition video/manual measurement/photographing/video/USB drive storage/image freezing/measuring data EXCEL output/graphic primitive EXCEL output/single reticle/double reticle/four transverse lines and four vertical lines/white balance adjustment/gain adjustment/saturation adjustment/reflection elimination adjustment/brightness adjustment/HDR depth of field adjustment/buttons and mouse dual control. An External HDMI Output is available for connecting a larger HDMI LCD display. USB interface for U-Disk storage.

Quickly, Exactly, Simply

Comfort, magnification and speed

With the BVM-2000N Digital Microscope, working fast and easy. The 12 "HD resolution monitor provides sharp, high-quality images.

The ergonomically tilting monitor makes the instrument comfortable and not tiring. The monitor image can be displayed on multiple screens simultaneously with HDMI splitter, so it's great for use in education as well. Manual focus and zoom enable quick setting.

Simple measurement and photography

User-friendly software lets you take pictures and measurements quickly and easily.

Images can be saved on an external drive.

The measurements can also be saved in an excel format for an external drive.

In the simple user interface, you can choose from 14 different measurement functions. Measurement data, text field and cross-linkable data can be attached to the image. The edge search function makes the measurements more accurate.

Camera Specifications

Image spec	1920x1080x24Bit	Shoot Mode	Manual/line control
Resolution	60 fps@1920x1080	Storage Mode	U Disk
Optical Size	1/3"	Crosshairs	Superpose or cancel
Pixel Size	3.75x3.75um	Lens Mount	C Mount
Color Adjust	R.G.B adjust individually	Working voltage	5V-12V
WB	One button/Manual	Camera Size	280x180x67mm
Displayer Size	11.6" 280x180x16mm	Displayer Resolution	1920*1080P
Exposure	Auto or Manual	Weight	450g
Contrast	Manual	Working Tempreature	0-70°C

Camera Operation Instructions

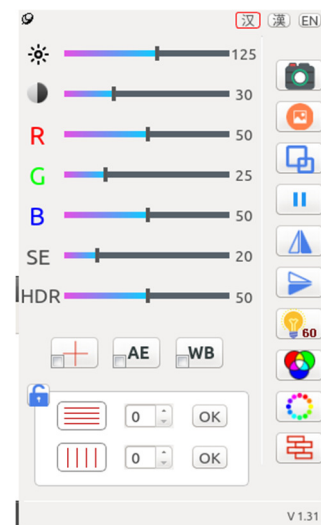

Preparation before using

- ① Select appropriate lens for camera
- ② Fix the camera to the holder and match the light source
- ③ Turn on the power and make sure the monitor indicates that the power light is on.
- ④ Select language after booting. Simplified Chinese, Trandition Chinese and Enlignsh are optional (Simplified Chinese is defaulted).

Camera Settings

Select the camera settings in the auxiliary tool, set the camera's own properties according to the natural light, the intensity of the light, the ratio of red, green and blue, HDR is the suppression glare mode, and the left and right keys of the function keys are reduced or increase the control of light; SE edge enhancement mode can improve the edge effect of the image by reducing or increasing the sharpening of the edge under specific requirements. But it also increases the noise of the image.

Button Function

	Brightness		Contrast
R	Red adjust	SE	Edge enhancement
G	Green adjust	HDR	Wide Dynamic
B	Blue adjust		

- 1) To adjust the image: Use mouse to click the slide block and set, or click the slide block and then roll the mouse to get the set.
- 2) To add horizontal line and vertical line: Set the number of lines and press "ok" key, then you will see the lines as you set. Put the mouse to any line, mouse arrowhead will change to hand form then you can move this line to deserved position. Adjust the line slightly with mouse roller.

Put the mouse to any line and press right key to adjust the line attribute, it will show the set window to adjust the line color, thickness.

Each line is with its unique coordinate position, you can calculate and set the distance between two lines.

- Central cross curve set: Press this button and it will show the set window, you can change the cross curve thickness and color.
- Auto exposure set: Press this button and adjust the current brightness. Select the lower left quarter block to get the auto exposure.
- White balance set: Put a white paper or object under the lens, press WB button,

camera will adjust RGB automatically under your lighting environment to make the color close to white. Select the lower left quarter block to get the auto white balance.

Photo button: Press this button to save the image. It will save to the U disk(if available) prior to camera internal storage.

This machine has one USB port only. Please capture the picture with the remote control. Or an external USB extender to insert a USB flash drive to store images.

Photo reading: Press this button to browse the images.

Image comparison: Press this button and get the image that needs to be compared, system will show this image into the right part of the screen, and show the real time image on the left of screen. Use the mouse to adjust the position of 2 images and compare.
