Form Measurement

Mitutoyo

Portable Surface Roughness Tester
Surftest SJ-210/310 *Series*

Surftest SJ-210 Series

The Surftest SJ-210 is a user-friendly surface roughness measurement instrument designed as a handheld tool that can be carried with you and used on-site.

Surftest SJ-310 Series

The Surftest SJ-310 is a compact, portable, easy-to-use surface roughness measurement instrument equipped with extensive measurement and analysis features.

Enhanced power for making measurements on site

Charging is reduced approximately one quarter of the time compared with conventional models. The detector supports a variety of measurement orientations and can perform measurements up against a wall surface or while facing upward. When combined with optional accessories such as a height gage adapter, the detector can perform measurements in various orientations and settings.

Mitutoyo

Surftest SJ-210 Series

Color graphic LCD

Intuitive display that's clear, sharp, and legible.

Large, 2.4-inch LCD

The large LCD provides excellent readability.

Backlight

The backlight improves visibility in dark environments.

Operation keys

- The keys on the front of the unit and under the sliding cover are well-labeled and easy to use.
- The user-friendly screen layout and arrow keys provide intuitive operability.
- Displayed settings can be changed easily by using the left and right arrow keys.
- Infrequently used keys are hidden under the sliding cover to prevent unintended operations.

Drive unit

The drive unit can be separated from the display unit by using a cable, allowing more flexible measurement.
The driver can be separated and reattached in one simple step.

There are many different kinds of drivers and detectors available.
(Refer to page 6, 13, 14 for details.)

Battery

The battery charges in one quarter of the time of previous Mitutoyo products.

Applicable standards

In addition to JIS and ISO, the Surftest SJ-210 also complies with ANSI and VDA standards.

Multilingual support

The display interface supports 16 languages.

High-speed USB communication

Data can be transferred to and from a computer via the high-speed USB interface.
Memory card support

The memory card slot lets you store large amounts of data onto a memory card.

## Extensive display features that assist measurement

- The highly visible 2.4-inch color graphic LCD with backlight lets you view the screen easily even in dark environments.
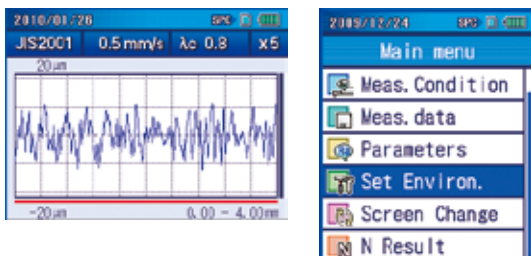

- Pass/fail results are displayed in color.

- Assessed profiles, load curves, and amplitude distribution curves can be displayed in addition to calculation results.
  Assessed profiles can also be zoomed up and down.
- The display mode can be easily switched between portrait and landscape.
- Calculation results are displayed in large characters.

Advanced data storage capabilities

- Up to 10 measurement conditions can be stored in the internal memory. Conditions can be quickly read according to the workpiece.
- An optional memory card can be used as an extended memory to store large quantities of measured profiles and conditions.

Storage capacity of memory card (optional)

Data type	Storage capacity of memory card
Measured profiles	10000
Calculation result	
Measurement condition	500
Display images	500

- Many interface options:
  - A USB interface is equipped as standard.
  - The Surftest **SJ-210** also provides an RS-232C output, Digimatic output, printer output, and foot switch input.

Advanced features

- The multilingual display interface supports 16 languages, which can be freely switched.
- Access to features can be password-protected.
- A quick-charge, long-life battery is provided.

Stylus alarm function

- An alarm warns you when the cumulative measurement distance exceeds a preset limit. This feature can be used to prevent problems that would be caused by worn out styli. Any value can be specified as the limit.
Easy setting

- Displayed settings can be easily changed by pressing the left and right arrow keys under the sliding cover. For example, these keys can be used to switch the cut-off value (λc) and the number of sampling lengths (N) on the measurement screen.

(Example of the measurement screen)

Setting parameters and recalculating results

- The required parameters can be selected from the screen. The sub-menu also lets you specify detailed settings such as the tolerance. After completing measurement, the parameters can be changed and calculation can be executed again* using the new parameters.
 * May not be possible, depending on the measurement conditions.

5

Mitutoyo
SJ-210 Series

A wide variation in system setup is possible with the detector + drive unit + display unit combination

### Highly functional detectors and drive units

The driver can be separated from the display unit and reattached in one easy step.

〔Storing drive unit in Display unit〕

〔Detaching drive unit from Display unit〕

A wide range of optional detectors is available, including detectors for small holes, extra small holes, gear tooth surfaces, and deep grooves.

Refer to page 14 for details of detector.

Detector supplied as standard

Selectable from the following two items.
- Measuring force: 0.75 mN
  Stylus tip: Tip radius 2 µm
  Tip angle 60°
- Measuring force: 4 mN
  Stylus tip: Tip radius 5 µm
  Tip angle 90°

Drive units (selectable)

Standard drive unit
- Popular standard drive unit

Transverse tracing drive unit
- Best suited for measurement of narrow, shrouded workpiece features such as crankshaft, EDM parts, etc. (Patent Registered in Japan)

Retractable drive unit
- The detector is in the retracted position at rest so it is immune from damage when inserted into a feature whose profile cannot be easily seen, such as a blind hole, etc.

Positive stylus contact indication

Stylus contact with the workpiece is indicated by color coding in the display. This is helpful when visibility of the surface to be measured is restricted (e.g. when measuring within a shrouded feature or groove).

No contact

*1 Calculation is available only when selecting the VDA, ANSI, or JIS '82 standard.
*2 Calculation is available only when selecting the ISO '97 standard.
*3 Calculation is available only when selecting the JIS '01 standard.
*4 Calculation is available only when selecting the ANSI standard.
*5 Not available when selecting the JIS '82 standard.
*6 Order the **SJ-210** printer (**178-421**, optional accessory) separately. See page 19 for details about the **SJ-210** printer.
*7 Standard deviation only can be selected in ANSI. 16 % rule cannot be selected in VDA.
*8 Auto-sleep function is invalid when AC adaptor is used.
*9 For connecting the calculation display unit and drive unit.
Note: To denote your AC line voltage add the following suffixes (e.g. **178-560-11A**).
    A for 120 V, C for 100 V, D for 230 V, E for 230 V (for UK), DC for 220 V (for China), K for 220 V (for Korea)

Mitutoyo

Surftest SJ-310 Series

User friendly, high-functionality display unit with integrated high-speed printer

The large 5.7-inch color graphic touch-screen LCD provides excellent readability. Furthermore, selecting icons from the touch panel display* provides intuitive and easy operation. The integrated high-speed printer offers the user the ability to perform the entire measuring and printing process with the push of a single button (START button).   * Text display can also be selected.

High-speed printer

BAC and ADC curves can be printed in addition to calculation results (including pass/fail results) and assessed profiles. The printer offers an easy-to-understand layout and can also print horizontally to match the content displayed on the LCD. Furthermore, printing speed is approximately 50 % faster than conventional models.

5.7-inch color graphic LCD with touch screen

Measurement Result ⟷ BAC curve
Measured profile One-touch ADC curve
switching

Sheet buttons
Frequently used functions, such as the measurement start button, are provided as rugged sheet buttons with excellent durability.

Built-in battery
With drastically enhanced power compared to conventional models, the Surftest **SJ-310** can make 1,500 continuous measurements on a full charge achieved in 4 hours.

Highly functional detectors and drive units

Detector supplied as standard

One of two types may be selected:
- Measuring force: 0.75 mN
  Stylus tip: Tip radius 2 μm
  Tip angle 60°
- Measuring force: 4 mN
  Stylus tip: Tip radius 5 μm
  Tip angle 90°

A wide range of optional detectors is available, including detectors for small holes, extra small holes, gear tooth surfaces, and deep grooves.
Drive units
- **Standard drive unit**
Popular standard drive unit

- **Transverse tracing drive unit**
Best suited for measurement of narrow, shrouded workpiece features such as crankshaft bearings, EDM parts, etc. (Patent Registered in Japan)
- **Retractable drive unit**
The detector is in the retracted position at rest so it is immune from damage when inserted into a feature whose shape cannot be easily seen, such as a blind hole, etc.

Links to a wide variety of external instruments

You can save parameter recalculations and measurement results in text format on a memory card and import into commercial spreadsheet software on a PC. You can also connect to a PC using the USB connector and use a dedicated software application to perform everything from measurement control and condition modification to issuing inspection result reports.

Switches between icon and text display

The display can be switched between icon and text, providing easy, user-friendly operation.
Additionally, the guidance feature provides detailed explanations of touch-screen buttons.

Icon

Text

Easy specification of assessment conditions from a list

Setting assessment conditions is simple because you can select the desired condition from a displayed list (e.g., standard, parameter).

Zooming waveforms and analyzing coordinate differences

You can not only magnify or shrink waveforms, but also calculate the coordinate difference between two points using a ruler operation. You can quickly check the irregularity status without waiting for a printout.

Deleting unnecessary data

With the Surftest **SJ-310**, you can delete portions of measurement data. This feature allows you to make new calculations by deleting data that should not be included in parameter calculation, such as data on a scratch.

Displaying GO / NG judgment results

By specifying a tolerance in advance, you can display pass/fail results in color.

OK

+NG

-NG

Surface texture symbol entry

You can enter assessment conditions using ISO/JIS surface texture symbols.
(Patent registered in Japan, U.S.A., Germany, UK, France)
(Patent pending in China)

SJ-310 Series

Measurement results can be displayed in several ways

Measurement results can be presented in the form of a 1-parameter, profile, 4-parameter or trace display.

1-parameter display: one parameter measurement result

Profile display: one parameter measurement result and the measured profile

4-parameter display: multiple parameter measurement results

Trace display: the ten latest measurement results using the same parameter

Recalculation function

After completing measurement, you can modify the assessment conditions (standard, profile, and parameter) and easily recalculate the results using the new condition.*   * Not possible with all measurement conditions.

Dual assessment of a single measurement

Using the result of a single measurement, you can make calculations or analyze assessment profiles under two different assessment conditions (standard, profile, filter, etc.) without using the recalculation feature.

Stylus alarm function

An alarm warns you when the cumulative measurement distance exceeds a preset limit. This feature can be used to prevent problems that would be caused by worn out styli. Any value can be specified as the limit.
Positive stylus contact indication

Stylus contact with the workpiece is indicated by color coding in the display. This is helpful when visibility of the surface to be measured is restricted (e.g. when measuring within a shrouded feature or groove).

No contact

Contact

Extensive statistical processing features

You can make a maximum of 300 statistical measurements using up to three parameters to obtain averages, standard deviations, maximums, minimums, passing rates, and histograms (upper and lower limits can be displayed). This feature is ideal for day-to-day data management.

Detector side

Note 1: Standard accessory for the standard/ retractable drive unit of the **SJ-310** Series
Note 2: Not attachable to the detector side of the transverse tracing drive unit.

Vertical positioning adapter

12AAA219

Note: Not available for the transverse tracing drive unit.
Vertical positioning adapter
12AAA219

Magnetic stand adapter

12AAA221
(Mounting spigot diameter is 8 mm)

12AAA220
(Mounting spigot diameter is 9.5 mm)

Magnetic stand adapter

Height gage adapter

12AAA222 (9 x 9mm)
12AAA233 (1/4 x 1/2")

Height gage adapter
Optional accessories for SJ-210/310 Series

Setting attachments

Enhances measurement efficiency by facilitating the measurement setup of multiple workpieces of the same type and of the hard-to-access sections of a workpiece.

Setting attachment: V type for measuring in the cylinder axis direction

The V-width is adjustable to the cylinder diameter facilitating axial measurement of a wide range of cylinder diameters.

● Adjustable range: ø5 - ø150 mm

178-033

Setting attachment: Slider type

This attachment is ideal for measuring a flat area of a workpiece that has an indentation or step that makes it difficult to attach the drive unit.

178-034

Setting attachment: Inside diameter type

Greatly facilitates measurement of internal wall surfaces of, for example, a cylinder block.

● Applicable diameter: ø75 - ø95 mm
● Accessible depth: 30 - 135 mm

178-035

● Custom-made for special order

Any specified attachment other than above listed can be custom-made for special order.
Please consult your local Mitutoyo sales office.
Example: measurements for crankshaft, cylinder-block bores

Calculation results input unit INPUT TOOL

This unit allows you to load Surftest **SJ-210/310** Series calculation results (SPC output) into commercial spreadsheet software on a PC via a USB connector. You can essentially use a one-touch operation to enter the calculation results (values) into the cells in the spreadsheet software.

USB Input Tool-Direct
USB-ITN-D

264-016-10
* Requires the optional connection cable.
1 m: **936937**
2 m: **965014**

Measurement Data Wireless Communication System U-WAVE

This unit allows you to remotely load Surftest **SJ-210/310** Series calculation results (SPC output) into commercial spreadsheet software on a PC.
You can essentially use a one-touch operation to enter the calculation results (values) into the cells in the spreadsheet software.

U-WAVE-R
(Connects to the PC)
02AZD810D

U-WAVE-T *
(Connects to the SJ-210/310 Series)
02AZD880G

* Requires the optional connection cable.
02AZD790D

Example of the connection with **SJ-210**

Digimatic mini processor DP-1VA LOGGER

By connecting this printer to the Surftest **SJ-210/310** Series' digimatic output, you can print* calculation results, perform a variety of statistical analysis, draw a histogram or D chart, and also perform complicated operations for X-R control charts.

* The symbol 'µm' is not printable, but measurement results can still be printed out without setting the measurement unit.

264-505A

● **SJ-210/310** Series → **DP-1VA LOGGER** Connecting cable
1 m: **936937**
2 m: **965014**

Foot switch

A foot switch is used to trigger measurement. This tool is very useful in cases where you need to measure the same workpiece multiple times using jigs and other fixtures.

12AAJ088

Roughness specimen W

Display: Ra = Approx. 3 µm,
　　　　　 Approx. 0.4 µm
178-604
Note: Ra = Approx. 0.4 µm can only be used for stylus tip checking.

Memory card (2GB / 8GB)

12AAW452 / 64PMI244

Note 1: micro SD card (with a conversion adapter to SD card)
Note 2: Not all memory cards can be recognized. Please use the optional SD memory card.

Optional accessories for SJ-210/310 Series

The Surftest **SJ-210/310** Series has a USB interface, enabling setting up measurement conditions and starting the measurement via PC.
We also provide a program that allows you to create inspection record tables using a Microsoft Excel* macro.
Required environment*:
- OS: Windows 7
     Windows 8
     Windows 10
- Spreadsheet software:
     Microsoft Excel 2010
     Microsoft Excel 2013
     Microsoft Excel 2016

* Windows OS and Microsoft Excel are products of Microsoft Corporation.

The optional USB cable is also required.
- USB cable for **SJ-210** Series (2 m)
     12AAL068
- USB cable for **SJ-310** Series
     12AAD510
Note: USB Communication cable (commercial item: Equivalent to A and mini-B type for device-host A)

This program can be downloaded free of charge from the Mitutoyo website.
http://www.mitutoyo.com/about/contactingmac/
surftestsimplecommunicationprogram/

Contour / Roughness analysis software FORMTRACEPAK-AP

More advanced analysis can be performed by loading **SJ-210/310** Series measurement data to software program **FORMTRACEPAK-AP** via a memory card (option) for processing back at base.
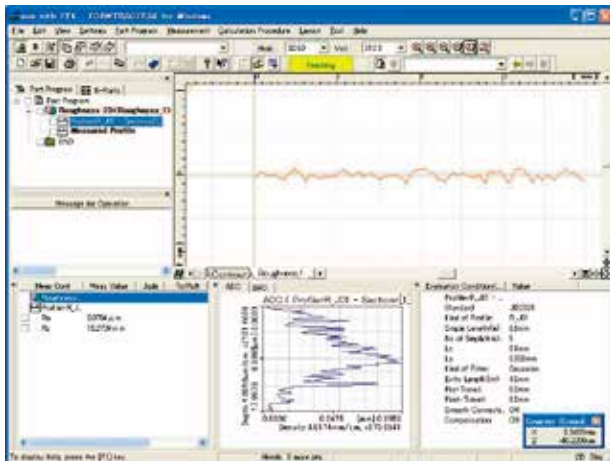

Refer to the **FORMTRACEPAK**
Bulletin No. 2010(2) for more details.

Optional Accessories

For SJ-210 Series

● Printer for **SJ-210**

Assessed profiles, calculation results and curves can be printed out by connecting the **SJ-210**-dedicated printer, which is palm sized (W×D×H: 93×125×70 mm) and can run on an internal battery.

■ Power supply can be selected. (AC adapter or battery pack)
■ Printable items: Measurement conditions, calculation results, assessed profile, bearing area curve (BAC), amplitude distribution curve (ADC), and environment settings.

178-421A

● Optional accessories and consumables for **SJ-210**

Protective sheet for the color LCD (5-sheet set)	**12AAL066**
Connecting cable (for **SJ-210** Series)	**12AAL067**

Unit configuration:
1) Printer main unit 1 unit
2) Printer connecting cable (For the connection to the **SJ-210**)
3) Printing paper 6 rolls
4) Battery pack 1 piece
5) Exclusive use AC adaptor (with AC power cord) 1 piece
Example of the output by the printer

Printer supplies:

Printing paper standard type (5 rolls)	**270732**
Durable printer paper (5 rolls)	**12AAA876**

For SJ-310 Series

● Optional accessories and consumables for **SJ-310**

Printer paper standard type (5 rolls)	**270732**
Durable printer paper (5 rolls)	**12AAA876**
Touch-screen protector sheet (10 sheets)	**12AAN040**
Connecting cable (for **SJ-310** Series)	**12AAA882**

Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.
