

PREMIUM GRANITE ANTI-VIBRATION TABLE

Designed for applications requiring extreme accuracy, the Granite Anti-Vibration Table provides a solid, stable platform ideal for:

- Microbalance weighing
- Electrophysiology
- Cell injection
- Scanning Tunneling Microscopy (STM)
- Confocal Laser Scanning Microscopy (CLSM)

Key Benefits:

- Natural Granite Construction – Superior chemical and stain resistance compared to synthetic materials
- Exceptional Durability – High resistance to impact and thermal shock
- Reliable Performance – Ensures stable operation for sensitive equipment
- Vibration Dampening – Monolithic structure reduces external disturbances
- Durable & Easy to Maintain – Smooth, wear-resistant surface is easy to clean

Specifications:

- Material: Natural Granite
- Manual Construction
- Dimensions: 1000W x 750D x 780H mm
- Weight: Approx. 500kg
